

KidO's

What Kids Are Crying For...

The **KidO's aerosol and oxygen Bear** is the ideal device to use for breathing treatments for pediatric patients with asthma and other respiratory illnesses.

The Bear can be a Toy...

The Bear can be a Lifesaver...

The Bear combines a recognizable, friendly toy with direct delivery technology to:

- * Calm the crying or frightened pediatric patient,
- * Deliver effective and immediate aerosol or oxygen therapy,
- * Insure maximum compliance with a child's breathing treatments.

The Bear Facts

The KidO's Bear has the appearance of a child friendly squeaky toy and has successfully provided aerosol or oxygen therapy for tens of thousands of pediatric patients.

Since it calms the crying or fussy child the Bear's design insures maximum compliance with breathing treatments for asthma and other respiratory illnesses. The Bear also incorporates direct delivery technology that focuses the administration of medication or oxygen thereby insuring that the patient receives maximum effectiveness and benefit from the treatment or therapy.

The Bear is 100% latex-free and is available in both yellow and blue. Each Bear includes a nebulizer cup and tubing set for attachment to a nebulizer or pump. The Bear is available individually or packaged six per box with three each yellow and blue Bears.

"In aerosol therapy compliance is rule one. The Bear calms the frightened, crying, wheezing child while providing effective direct delivery of medication."

Robert I. Kramer, MD, FAAP
